# CS 462

Senior Software Engineering "Capstone" Project

## Summer 2025
Acceptance Document

**Date:**
**Author(s):** Nathan Sweet (sweetn@oregonstate.edu), Tristan Hook (hookt@oregonstate.edu), Ashley Doerfler (doerflas@oregonstate.edu)
**Client Contact(s):** Austin Fox (Austin.Fox@qorvo.com), Kristofer Bailey (Kristofer.Bailey@qorvo.com)

## Unsupervised Wafer Map Classification Deliverables

- Wafer Map Classification Model
- Data processing function
- Method for creating new models from a dataset
- Method to classify wafers with a model
- Tools for comparing model results
- Results from our model runs

Clients have the ability to:

- Access all code and documentation
- Build and deploy the solution
- Administer the deployed application
- Understand future maintenance requirements
